Extruded WP 53 Safe

by Warm Protection Products Ltd

The WP 53 double skinned extruded shutter has been designed for maximum performance with maximum security for large openings up to 5600mm wide. Thick double skinned extruded profiles with special shaping ensures tight coil sizes thus reducing box sizes to leave a visually attractive roller shutter system.

Constructed from an all aluminium design the WP 53 enhances any application it may be applied to while still retaining a high security defence against burglary.

Thick extruded guide rails and optional base rail foot complete this extremely effective door.
